New Powerhouse

2020-06-05Q

No. Update #1 (Project Scope Description)

Detail:

Work of this Contract comprises general construction of a new Powerhouse and Parking Lot. The Powerhouse build includes power equipment associated with the primary supply to the site during normal and power outage conditions. Included are two high voltage switchgear lineups and three diesel generators. Support systems include fuel storage and transfer equipment and various building services (ventilation, lighting, security, etc.).
